

Monash College

smart furniture solution for a growing student body.

furnware[®]

Rapid growth in student numbers at Monash College presented challenges at its City and Clayton campuses. New learning spaces were needed that looked great, were safe, practical and fitted the existing footprint.

The City campus urgently needed more lab space to cater for the surge in student numbers. Project Manager Emma Schmutzer worked with Foundation Year Director Anne Bright and Furnware to furnish new science labs.

Two existing rooms were chosen for conversion into physics labs and the college worked with Furnware to develop a smart-looking furnishing solution.

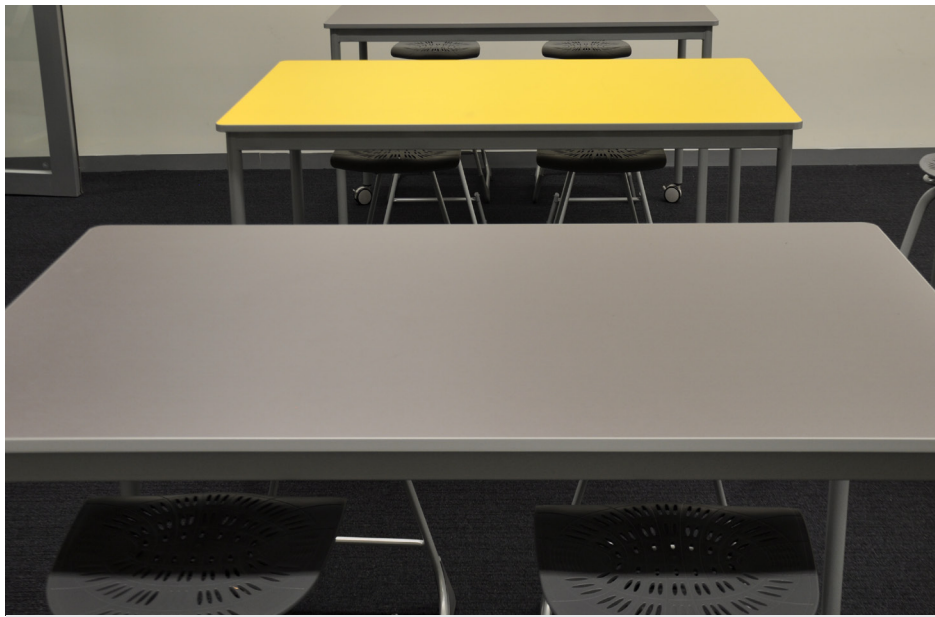

“We wanted it to be safe and practical, but also visually appealing and modern,” said Anne. “We also wanted the items to be used for other learning spaces should further changes be sought in the future.”

The Bodyfurn® Tablet Arm creates a stable, usable surface for note taking, laptop use and exams.

Rectangle Tables on castors are easy to move around the classroom to suit the task at hand.

“the lecture theatre was old and tired, the new space needed colour and vibrancy.”

Emma Schmutzer, Project Manager

Pops of bright colour are great with the grey Bodyfurn® Sled Chairs.

Bodyfurn® Lab Stools and high Rectangle Tables create a flexible lab space.
